TELEMENTAL HEALTH ARE YOU IN COMPLIANT?

LIVE ONLINE WORKSHOP
6 Clock Hours

WEDNESDAY, SEPTEMBER 14, 2022

9:00am-4:00pm

ONLINE ZOOM EVENT

Participants completing this program will be able to:

1. Conduct legal, ethical and evidence-based telepractice.
2. Explore the benefits of telemental health.
3. Analyze risk factors associated with conducting telemental health.
4. Identify best practices and assessing clients appropriateness for telemental health.
5. Analyze Georgia Composite Board Telehealth policy.
6. Apply HIPAA-HITECH policies for compliance for PHI and ePHI.
7. Apply ethical telepractice with diverse populations.

Terms

Telepractice is used instead of telemedicine or telehealth to prevent patients from thinking that virtual services are only used in medical settings.

Telemental health is the use of telecommunications or videoconferencing technology to provide mental health services.

Provider is a term used for health professionals who provide health care services.

Synchronous training run in real time, with participants attending together from different locations.

PHI stands for Protected Health Information. The **HIPAA** Privacy Rule provides federal protections for personal health information held by covered entities.

Cultural humility involves an awareness of one's limitations to understanding a client's cultural background and experience.

EPHI is defined in HIPAA regulation as any protected health information (PHI) that is created, stored, transmitted, or received in any electronic format or media.

Therapies treatment intended to relieve or heal a disorder.

Psychotherapy the treatment of mental disorders.

The HIPAA Security Rule requires physicians to protect patients' electronically stored, protected health information (known as "ePHI") by using appropriate administrative, physical and technical safeguards to ensure the confidentiality, integrity and security of this information.

HIPPA Privacy Rule requires appropriate safeguards to protect the privacy of protected health information and sets limits and conditions on the uses and disclosures that may be made of such information without an individual's authorization.

The Comprehensive Patient Assessment for Using Telehealth at Home is a comprehensive approach for an intentional remote patient meeting that provides a high-quality patient encounter when using technology.

Best Practices a procedure that has been shown by research and experience to produce optimal results and that is established or proposed as a standard suitable for widespread adoption.

Evidence-based practice (EBP) is the objective, balanced, and responsible use of current research and the best available data to guide policy and practice decisions, such that outcomes for consumers are improved. an electronic device for storing and processing data, typically in binary form, according to instructions given to it in a variable program.

Computer an electronic device for storing and processing data, typically in binary form, according to instructions given to it in a variable program.

Telephone a system for transmitting voices over a distance using wire or radio, by converting acoustic vibrations to electrical signals.

Video the recording, reproducing, or broadcasting of moving visual images.

Text message an electronic communication sent and received by mobile phone.

APT Counseling Services, LLC has been approved by NBCC as an Approved Continuing Education Provider, ACEP No. 6978 Programs that do not qualify for NBCC credit are clearly identified. APT Counseling Services, LLC is solely responsible for all aspects of the program. Program provides 6 clock hours and counts as core hours for LPCs, LAPCs, NCCs, CCMHCs, and related hours for MFTs and SWKs.
